Can TiviMate Use Multiple Playlists?

Yes, TiviMate supports multiple IPTV playlists, such as:

- Different IPTV providers
 - Separate country lists
 - Sports / Movies / Kids categories
 - Backup IPTV sources
-

How to Add Multiple Playlists in TiviMate

Step-by-Step:

1. Open **TiviMate**
 2. Go to **Settings** or main screen
 3. Click **Add Playlist**
 4. Choose method:
 - M3U URL
 - Xtream Codes API
 5. Enter details
 6. Click **Next**
 7. Repeat for each playlist
-

How to Switch Between Playlists

1. Open TiviMate main menu
 2. Go to **Playlists section**
 3. Select desired playlist
 4. Channels will update automatically
-

How to Organize Playlists

TiviMate allows you to:

- Rename playlists
- Sort by provider
- Group channels
- Hide unwanted categories

This helps keep everything clean and easy to use.

Common Issues with Multiple Playlists

Playlists Not Loading

- Wrong login credentials
- Expired IPTV subscription
- Server downtime

Channels Mixed or Duplicated

- Overlapping categories
- Multiple providers with same channels

App Slowing Down

- Too many playlists loaded
- Weak device performance
- Large EPG data

How to Fix Playlist Problems

- Remove unused playlists
- Restart app and device
- Clear cache
- Use Xtream Codes instead of M3U
- Use stable provider like Viucast

Best Practices for Multiple Playlists

- Keep max 2–4 playlists active
- Use clear naming (Sports, Movies, etc.)
- Prefer Xstream Codes API
- Regularly update playlists
- Use tvonapps.com for setup guidance

Pro Tips

- Backup settings regularly
- Use Ethernet for stability
- Avoid low-quality IPTV providers
- Separate playlists by content type
- Test each playlist before daily use

Conclusion

Managing multiple IPTV playlists in TiviMate is easy when properly configured.

To get the best experience:

- 👉 Use **tvonapps.com** for full IPTV setup and troubleshooting guides
- 👉 Use **viucast.com** for stable IPTV playlists and smooth performance

Together, they ensure a clean, organized, and reliable IPTV experience in 2026.
